

Mordus Angels Eve Forums, Team-speak, and Jabber Guide

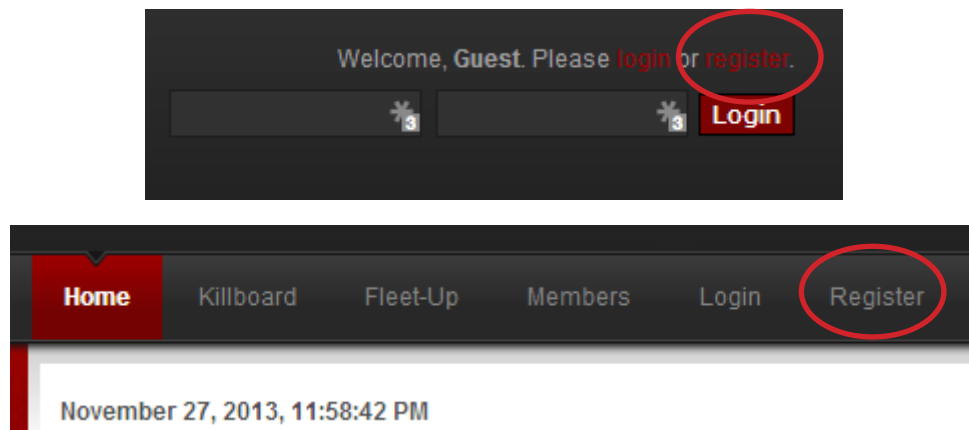

Welcome to the Mordus Angels Eve Forums, Teamspeak 3, and XMPP Instant Message service. This was put together with the blood and tears of many brave souls, and if you don't follow these instructions properly, then not only will you not be able to chat away with your friends whilst pew pewing...we might just have to kill you. In all seriousness, these are both essential and required components to our alliance. Please read the instructions carefully before clicking the buttons.

Step 1 - Register on the website.

Why do we have a separate website/forum thing you have to register on? Because that's how the plug-ins work. Now eat your veggies and start following directions. If you do this right, you should be done in 5-10 minutes.

First, go here: mordusangels.net

You will then need to register. Click on either "register link" circled below:

Accept the terms and agreements, which will take you to the actual registration page, which looks like this:

Handsome Millionaire Playboys Forum » Register

Registration Form

Required Information

Username: ⓘ ?

Email:

Type the letters shown in the picture:

Click on the link next to: TEA Required Options: [CharacterInfo](#), [CharacterSheet](#), [FacWarStats](#)

This will take you to the EvE API management page with a pre-filled sheet.

- Log in with your **PRIMARY TOONS ACCOUNT** (this will be the toon name that appears in the Teamspeak Window)
- Make sure to Check the 'No Expiry' box and give it a name.

- When done, click the 'submit' button, which will then take you to the API key management screen.
- Go back to the forum registration page. Make sure your user name is your **PRIMARY TOON's NAME**.
- The email will be whatever you would like to receive email too, and remains private.
- Copy the ID number from your new key on the EvE API Screen
- Then do the same for the really long Verification Code.
- Click the 'Get Characters' button.
- Select your PRIMARY TOON's NAME from the dropdown box.
- Choose a password, verify it,
- Type in the Verification letters and click the 'Register' button. Should look like this:

You are now ready to move onto jabber and TS registration

Jabber Registration

This service will allow you to set up an instant messaging service on any IM client that allows generic XMPP registration.. There are a TON of them out there, but I use Pidgin ([you can download it here](#)). Mac users can use Adium ([download it here](#)). The setup will essentially be the same, but I will run through setting up Pidgin at the end.

On the navigation toolbar, select 'Profile', then 'forum profile'. On the sub-nav, hover over 'modify profile', then down to 'Temars Eve API'

1. Select 'Jabber' from the Sub-Navigation bar.
2. Select your **MAIN TOON** from the dropdown 'Main Char' box.
3. Pick a password. **THIS WILL BE YOUR LOGIN PASSWORD TO XMPP**. So don't forget it. Also note your **JABBER LOGIN** name. If your toon name had a space, it will become an underscore.
4. When done, click on the 'Change Profile' Button.

A screenshot of the 'Temars Eve Api' registration form. The form has a red header bar with the text 'Temars Eve Api'. Below the header, there is a section titled 'This section allows you to Gain Access to Jabber'. The form contains several fields: 'Name' with the value '[HAMPB] Balishae', 'Jabber Login' with the value 'balishae', 'Main Char' with a dropdown menu showing 'balishae', and 'Password' with a masked input field. The 'Jabber Login' field is circled in red and labeled with a blue '2'. The 'Main Char' dropdown is circled in red and labeled with a blue '3'. The 'Password' field is circled in red and labeled with a blue '4'. A 'Change profile' button is circled in red and labeled with a blue '4'. The background shows a sidebar with 'Profile Info' and 'Modify Profile' tabs, and a main content area with a 'Character to use' dropdown.

Now it may take a little bit for your TS permissions to get approved by our cron job. IM should be instantaneous. Now fire up Pidgin.

Pidgin Setup

I'm going assuming you were able to get Pidgin installed.

- Open Pidgin - **If it asks you to accept a certificate, click 'Yes'.**
- On the tool bar at the top, select Accounts
- Select 'Manage Accounts' from the dropdown. You can also hit 'CNTRL-A'.
- Click the 'Add' Button

On the 'Basic' Tab:

- Under login options -> **Protocol:** Select XMPP from the drop-down menu
- **User Name:** will be what was listed under the Jabber Login line on the forum.
- **Domain:** mordusangels.net
- **Resource:** left blank
- **Password:** Whatever password you selected during the jabber registration on the forums.
- **Check the 'remember password' box**

Everything else should be left the defaulted. Click 'Save'.

Broadcasts must be manually added, and if you should be able to broadcast, we will send additional instructions.

RULES ABOUT BROADCASTING - READ BEFORE USING

For FCs, Cap Pilots, and other folks who can broadcast

- Any Fleet Ops
- A roam that will be active for more than 30 minutes
- Emergency Requests (ie, POS attack, Supers bubbled, Capital bounced off station)
- Reminders on scheduled roams/meetings at the 1 hour, 30 minutes previous, departure to Op
- Alliance meeting

If this becomes abused, we will restrict it and you will have one very angry CEO to answer to. Be smart. Do not broadcast random jokes, thoughts, non-eve related items. **First strike will cost you 100 mil. Second strike will get you banned from the server.** Feel free to use the IM features to talk to pilots, but the broadcasting is for alliance events only.

IM+ Setup (for iOS/Android)

Download **IM+** from the app store onto your iPhone, iPad, or Android.

On the 'Accounts' Tab on bottom:

- Select the **'+ Add new account'**
- Select **'Jabber'**
- **Login:** your jabber **username@mordusangels.net** (you have to have the domain part on there or it won't work)
- **Password:** your jabber password
- Save

All of your contacts should be added automatically.

Teamspeak 3 Registration

Select the 'TeamSpeak' tab from the Temar's API section.

On the Main Character drop-down, select your main toon. Please note the full name.

DO NOT HIT THE REGISTER BUTTON YET.

Open up the Teamspeak client:

- Go to 'Manage Bookmarks'
- Select 'Add Bookmark' from the top nav bar
- **Label:** Whatever you like - MOA TS
- **Address:** mordusangels.net
- **Nickname:** Needs to match the 'Main Character' you selected in the dropdown box on the forum Teamspeak page.
- **Password:** blank

Connect to the MOA Teamspeak server. After connection, go back over to the forum page.

- Click on the 'Register' button on the forums. This will assign you your permissions. It should be instantaneous. You can check as select your name on the TS client, and it should have team as the server group

This section allows you to Gain Access to TeamSpeak
